1. General Provisions

Final state examination is the final stage of education on basic educational program in "Sociology". It is for students of Master's degree. It is an important part of the educational process and is intended for an objective evaluation of acquired knowledge during the training and skills for future professional activities. Its allows to determine the level of professional training of future specialists. Final state examination aims to establish the level of compliance training graduates from master requirements.

The program involves the assimilation of students, masters, taking the exams, the knowledge they have acquired in the study of all graduate courses, and corresponds to the chosen sections of different training cycles, forming specific competencies.

2. Organizational guidelines

State examination involves verification of theoretical knowledge and practical skills acquired by students of Master's degree for learning objects, learning system which gives an idea of modern social science and lay the foundation for further improvement of professional training of sociologists. Each student during the exam receives individual paper which included 4 questions on subjects that are part of the State exam Program. Each question is estimated at 20 points. The total number of points a student can get on the exam is 100 points.

If the student eventually gets less than 60 points, (s)he exhibited poor score on the exam.

The examination is conducted orally.

3. Content of Integrated State Exam

3.1. New conceptual strategies in theoretical sociology

Sociology as a social science: traditional and contemporary understanding. Social, political and technological changes and the development of sociology in the second half of the twentieth century and the twenty-first century. Globalization as a leading trend of transformation of theoretical sociology in the XXIth century.

Main cognitive orientation in modern theoretical sociology: the scientific, humanitarian and technological (art) orientations.

The structural differentiation and the cognitive levels of sociological knowledge. General sociological theory and the main sociological paradigms.

Theoretical synthesis as the cognitive and epistemological process. Modern scientific understanding on types of the theoretical synthesis in sociology.

Keywords: globalization, modern theoretical sociology, levels of sociological knowledge, main sociological paradigms, theoretical synthesis as process.
