APPROVED

at the session of the academic council of
Faculty of Sociology

Record # 8

of "28" February 2018

Dean Andrii Gorbachyk

PROGRAM OF ENTRANCE EXAMINATION (INTERVIEW)
for the Master Degree Program on Sociology,
the educational program "Sociology" (054)
(for foreign applicants with Bachelor's degree)

I. General provisions

The entrance examination is an important part of the educational process and is aimed at comprehensive and objective evaluation of knowledge and skills, acquired by applicants through institutional education and self-education. Such evaluation makes it possible not only to determine the quality of educational background of entrants, but also to map its weaknesses for effective planning of their study at Master's program.

II. Recommendations on administration of the examination (format and evaluation requirements)

The entrance examination includes testing of applicant's theoretical knowledge and practical skills, acquired in the course of Bachelor's program in Sociology at educational institutions of other countries.

The entrance examination is administered in written and oral communication format. Every applicant receives personal question sheet, which contains two opened-ended questions on theory of Sociology and research methods. The entrance examination pursues the goal of establishing qualification of applicants and, therefore, is scored as either passed or not passed.

The answers of applicants should demonstrate their mastery of classical and contemporary sociological theories and approaches, intelligent use of sociological concepts, understanding of purpose and functions of the program of sociological research, awareness of specific features and principles of selection of data collection methods.

The entrance examination aimed at identification of applicant's qualification in Sociology and is evaluated within two-point evaluation scale (passed or failed). For intermediate evaluation the commission uses the 100-point scale where the 100 grade is the highest evaluation, and the 60 grade is the lowest evaluation allowing the applicant to take part at the entrance competition. Marking scale: Fail, D, C, B, A. The grades awarded are A, B, C, D, or Fail. The grade for a non-passing result is Fail. The applicant's performance is assessed with reference to the learning outcomes on Sociology. For the grade of D the applicant must show satisfactory results. For the grade of C the applicant must show good results. For the grade of B the applicant must show very good results. For the grade of A the applicant must show excellent results.

The applicants, whose answers are estimated less than 60 score, will be barred from the entrance competition.

The applicant's answers will be checked and evaluated deliberately by special academic examination commission. The final examination score will be confirmed by signatures of the commission's all members. It should be made public within a day after administering of the examination.

PROGRAM

FOR THE ENTRANCE EXAMINATION

1. Sociology as a science. Origins and development of sociological knowledge.

Specific features of sociology as a science, its research object. Major approaches to scientific definition of the social. Sociology is within system of social sciences and humanities, its main functions. The historical stages in development of sociology.

The system of sociological knowledge and its components. Foundation of the general sociological theory: principles, concepts, and cognitive models, theoretical and empirical methods.
